# The Marine Mammals Of The Gulf Of Mexico (W. L. Moody Jr. Natural History Series)

## Synopsis

The Gulf of Mexico teems with a much greater number and range of whales, dolphins, and other mammalian species than was suspected only a few years ago. In *The Marine Mammals of the Gulf of Mexico*, Bernd Würsig, Thomas A. Jefferson, and David J. Schmidly provide information on all known species, valuable identification tools, and up-to-date research on behavior, group sizes, reproduction, and underwater calls. The introduction presents an overview of the whales, dolphins, pinnipeds, and other marine mammals of the world, discussing their basic biology and outlining their differences. The authors then describe the characteristics of the Gulf that affect the marine mammal species inhabiting it or entering its waters occasionally. The main body of this important new guide provides a checklist of the species, keys to identification, and species descriptions of the marine mammals known or believed to occur in the Gulf. More than thirty color plates by marine artist Larry Foster and thirty-two color photographs illustrate these creatures. Another important feature of this volume is a set of drawings of the skulls of all the Gulf species; these skull keys will enable individuals involved in Gulf Stranding Networks, volunteer operations that rescue and recover beached or stranded marine mammals, to easily identify species along the Gulf coast. Finally, the book discusses environmental problems of the Gulf as they affect marine mammals and considers the conservation and management tools needed to preserve them in their habitats. *The Marine Mammals of the Gulf of Mexico* will prove a useful reference for marine biologists, volunteers with scientific and rescue organizations, and anyone else interested in further study of these magnificent animals.

## Book Information

Series: W. L. Moody Jr. Natural History Series (Book 26)

Hardcover: 256 pages

Publisher: Texas A&M University Press; 1st edition (January 1, 2000)

Language: English

ISBN-10: 0890969094

ISBN-13: 978-0890969090

Product Dimensions: 6.4 x 0.8 x 9.6 inches

Shipping Weight: 1.6 pounds (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars [See all reviews](#) (2 customer reviews)

Best Sellers Rank: #2,401,539 in Books (See Top 100 in Books) #92 in [Books > Science & Math > Nature & Ecology > Field Guides > Mammals](#) #912 in [Books > Science & Math > Biological](#)

## Customer Reviews

This book describes the marine life of the Gulf of Mexico with numerous color photos and paintings by artist Larry Foster. This is a well-written and highly-recommended reference guide that will be particularly useful to readers or travelers visiting the Gulf. Included in the book is a set of drawings of the skulls of Gulf species allow readers who find beached animals to identify the animal. Sketches provide dorsal, ventral and lateral views. The authors discuss the environmental problems of the Gulf as they affect marine mammals, concluding: "Suffice it to say that our love for these creatures has the capacity of being turned into a positive conservation force, not for just them but also for their fragile environments worldwide." This is a recommended title!

I found a lot of good and useful info illustrations very helpful would recommend to someone interested in learning about them
