The Sacred Network: Megaliths, Cathedrals, Ley Lines, And The Power Of Shared Consciousness

Synopsis

How sacred sites amplify the energies of consciousness, the earth, and the universe • Examines the web of geometrical patterns linking sacred sites worldwide, with special focus on the sacred network of ley lines in Paris • Unveils the coming state of shared consciousness for humanity fueled by the sacred network • Reveals how consciousness is a tangible form of energy First marked by the standing stones of our megalithic ancestors, the world's sacred sites are not only places of spiritual energy but also hubs of cosmic energy and earthly energy. Generation upon generation has recognized the power of these sites, with the result that each dominant culture builds their religious structures on the same spots--the Cathedral of Notre Dame in Paris, for example, was constructed over a Temple to Diana that in turn had been built over a stone pillar worshipped by the Gauls. In *The Sacred Network*, Chris Hardy shows how the world's sacred sites coincide with the intersections of energetic waves from the earth's geomagnetic field and how--via their megaliths, temples, and steeples--these sites act as antennae for the energies of the cosmos. Delving deeply in to Paris's sacred network, she also explores the intricate geometrical patterns created by the alignments of churches and monuments, such as pentagrams and Stars of David. Revealing that consciousness is a tangible energy, she explains how the sacred network is fueling an 8,000-year evolutionary cycle initiated by our megalithic ancestors that will soon culminate in a new state of shared consciousness for humanity.

Book Information

Paperback: 392 pages

Publisher: Inner Traditions; Reprint edition (February 23, 2011)

Customer Reviews

The beauty in this book lies in the fact that the author has personally experienced strong energetics of different frequencies and explains how she does it, what the energies are shaped like and the physics behind them. She maps out a place in France that has the energetics and what buildings and places are included with diagrams explaining it all. You won't get an entire map of the world but you will get an indepth explanation of the actual physics behind leyline energetics and a detailed personal experience that you may be able to tap into and experience on your own.

This has the writer's experiences, so if you looking to understand what they saw and how they came to their conclusions on energy grids in the earth, great, but not a lot of descriptions around what really makes these things work. Though to be fair, I might have missed it. It was incredibly, and overly, detailed while I really was looking for better descriptions and/or definitions of what the different energies were. As an example, after reading (and lots of skimming) this book, I could not tell you what a ley line is. I know what the author SAW, but that's their experience.

I couldn't possibly be more interested in this subject. I looked forward to its arrival! What a disappointment - This book is so dryly written, its hard to read hard to read, even for the choir.

This exploration of grids, lay lines and energy centers helped expand my brain to include other realities. Her attention to detail helps center an other worldly venue.

The Book is ok. But really for this sort of book really she needs to be a Dowser (Diviner) She is not. So the book is missing this important element. I will not be buying books again on this topic written by non Dowser (Diviners) again.
